*They will learn ….*

# Software is Eating the World

*"People change, then forget that they changed, and act as though they always behaved a certain way and could never change again. Because of this, unexpected changes in human behavior are often dismissed as regressive rather than as potentially intelligent adaptations. But change happens anyway ..." - http://breakingsmart.com/season-1*

# Goals

1. *Deliver working software*
2. *Enable all possible outcomes.*

# *Waterfall*

1. *Plan everything*
2. *Deliver.*

# *Iterative*

1. *Plan what's next*
2. *Deliver*
3. *GOTO 1;*

# *Enginering Practice*

1. *What we do changes frequently*
2. *How we do it changes infrequently.*

## Contributing to Grape

Grape is work of hundreds of contributors. You're encouraged to submit pull requests, propose features and discuss issues. When in doubt, ask a question in the Grape Google Group.

### Fork the Project

Fork the project on Github and check out your copy.

```
git clone https://github.com/contributor/grape.git
cd grape
git remote add upstream https://github.com/ruby-grape/grape.git
```
